ACE 3000 V6 Released – A Designer’s Link Between EDA Data

(San Diego, CA) – Numerical Innovations, LLC (NI) today announced its release of ACE Translator 3000 V6.

ACE Translator 3000 Version 6 provides over 100 translators between most common EDA, CAD, and 3D formats - all in a single intuitive environment. ACE simplifies the translation process, and the built-in viewer is user-friendly with powerful editing & repair features. ACE Translator 3000 will successfully fit into a designer’s daily workflow and files outputted from ACE are optimized to be compatible with all design systems.

"ACE 3000 Version 6 provides engineers and designers with a link between all the most common EDA and CAD formats", states Simon Garrison founder of Numerical Innovations, LLC.

A powerful new licensing system allows the user to install ACE 3000 V6 on any computer; no longer being locked to a single machine using Host ID. ACE supports AutoCAD 2010 and AutoCAD 2011 DWG/ DXF files. Export (Gerber, DXF, ODB++) will automatically detect Arcs (improve quality plus 70% smaller file sizes). The Object Hover Tool drastically improves object selection and user experience. The Draw to Flash Selective allows users to Flash all selected objects at once to a chosen shape. Other features include: Interactive Join - Selectively connect adjacent line & arc segments to form complex boundaries, and Convert to Cell and Convert to Custom Aperture; Bug in GDSII Export; Boolean Engine to Perform 2D Boolean operations: AND, OR, XOR, Subtract, Invert, Sequential, Sizing, and more; Bitmap Export - Add Option to output as Negative; Image Export - Add Option to output as Negative; Add Dimensions, Support for Barcode Fonts and much more. The ACE Free Trial has been extended to 4 hours of unlimited use.

ACE Translator 3000 starts at \$995 (USD) with several optional Add-Ons available, and may be purchased directly from the Numerical Innovations website. Free Tryouts are also available.

About Numerical Innovations

Numerical Innovations, LLC was founded based on the industry need for easy to use, aesthetically pleasing software tools that are clever and accurately facilitate electronic designs for manufacturing. Utilizing an advanced, proprietary C++ development platform called Universal Tool Platform (UTP) created in-house, along with their experience developing a wide variety of commercial and custom EDA tools; Numerical Innovations, LLC has been able to successfully enter the market with tools providing a common user interface (UI) model and Interoperability, which will continue to satisfy customer demand and gain the reputation of producing easy to use, high quality tools.
