## Numerical Innovations, LLC Introduces New Website, Blog & Support Center

(San Diego, CA) – Numerical Innovations, LLC (NI) introduces a new website, blog, and support center.

Numerical Innovations is pleased to announce their newly updated Website which gives customers an easier navigation through Products, Downloads and support pages.

This new website now allows users to Download instantly their product of choice! No more waiting for an email with a link attached, causing delay and confusion. Now users will have the instant satisfaction of having it at their fingertips as soon as they need it.

“We also have a clear grid with all our pricing on one page allowing designers to view exactly what they want and what the purchase prices are. No more guess work or confusing pages to flip back and forth to. It's all in one place!” states Simon Garrison founder of Numerical Innovations, LLC.

The next latest feature is Twitter and Blogs. Want to know what the latest buzz is at Numerical Innovations? Well now people can, because when they visit the NI website they'll be able to see the latest tips and technical support answers in one place right on the Home Page.

And last but not least, the most important is the support NI gives customers. Numerical Innovations' "Support Plan" allows the user's company to receive E-mail and "Live" Telephone Technical Support, All Upgrades, and license key replacement for the life of the plan.

“Sometimes the old-fashioned way is still the best, so if designers have a specific question that cannot be answered on the user forum, or via technical support e-mails, then they can feel free to call our support team at: 1-800-269-5045,” mentions Garrison.

NI would like to thank their customers again for all their continued support. They truly appreciate it and look forward to continuing to work closely with their customers in the future. To learn more about their products, visit [www.numericalinnovations.com](http://www.numericalinnovations.com).
